

Get More Value Out of Cognite Data Fusion®

With QuickStart, enterprises have the right data platform in place to deploy operational use cases and AI at scale to achieve millions of dollars in improved profitability.

“With data all in one place and at everyone’s fingertips, we can spend less time trying to figure out the problem, and more creating solutions.”

Production Manager,
Celanese

Cognite Data Fusion® unifies all IT, OT, engineering, and unstructured data, enabling organizations to supercharge common use cases like **turnarounds, troubleshooting, and field operations** to increase production uptime and deliver fast ROI.

Beyond these prescribed starting points, Cognite’s flexibility empowers organizations to develop custom AI-powered solutions tailored to their unique operational challenges, ensuring maximum value and adaptability to meet evolving needs.

Scale smarter and drive ROI faster with Cognite’s data-driven turnarounds, advanced troubleshooting, and transformative field operations offerings.

At Cognite, we **ensure success** for industrial customers such as:

Cognite Data Fusion® is a market-leading DataOps and AI platform for enterprise-scale, complex industrial data management projects. It solves high-context, mission-critical operational challenges for scaling industrial AI and data management solutions.

Data-Driven Turnarounds

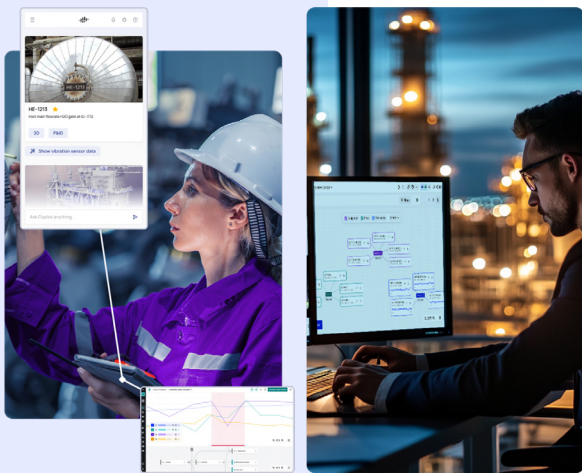

Plan and execute smarter, AI-enhanced turnarounds with accurate data and insights.

Cognite connects your TAR tools and systems, providing a unified platform to streamline the turnaround process. Advanced visual planning tools and real-time contextualized data empower planners to create optimal plans and adapt to on-the-ground realities as they evolve.

With Cognite Data Fusion®, you gain a real-time collaborative space that bridges the gap between the office and the field, **enabling 15%- 30% reduction of planned downtime and helping to stay under budget.**

Advanced Troubleshooting

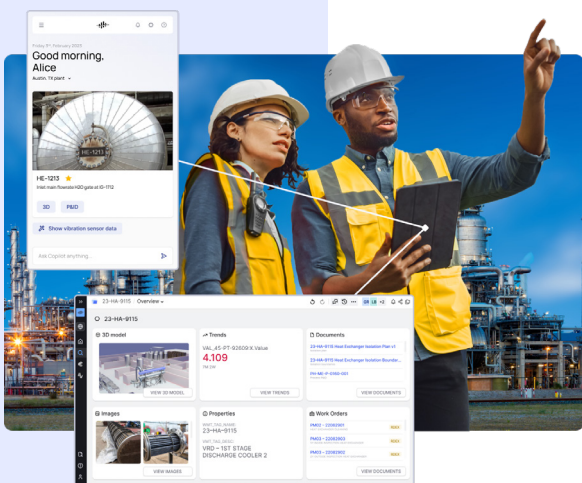

Streamline and accelerate troubleshooting to minimize downtime and prevent production loss.

Cognite transforms troubleshooting by offering powerful, intuitive, and collaborative root-cause analysis capabilities for advanced troubleshooting.

With Cognite Data Fusion®, your teams can access a single suite of collaborative tools, helping them quickly uncover and share insights for advanced risk identification to **achieve a 1-2% increase in EBIT from higher production uptime.**

Transformative Field Operations

Drive and deliver more efficient and transformative field operations.

Cognite Data Fusion® puts real-time data into the hands of every field worker and empowers decision-makers to enhance productivity across the entire site.

With Cognite Data Fusion®, field workers have complete visibility of planned activities. You can enable digital operator rounds, capture high-quality field observations, and collaborate with the teams in the office for more reliable and productive fieldwork. **Increase throughput by 10-30% by minimizing downtime and operating equipment at peak efficiency.**
